PHONE PE BUSINESS ANALYSIS SUMMARY

Choose a scenario:

Scenario_2: Device Dominance and User Engagement Analysis

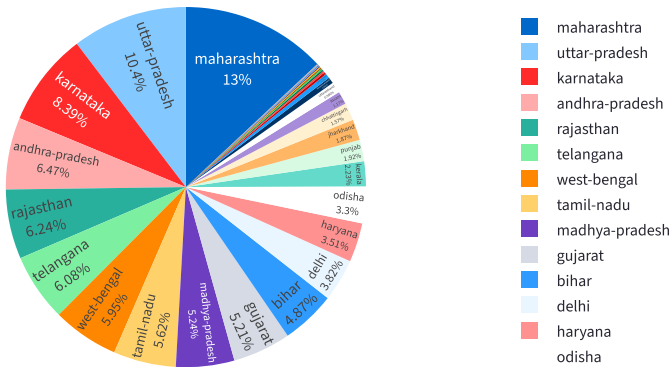

2. Device Dominance and User Engagement Analysis

Scenario

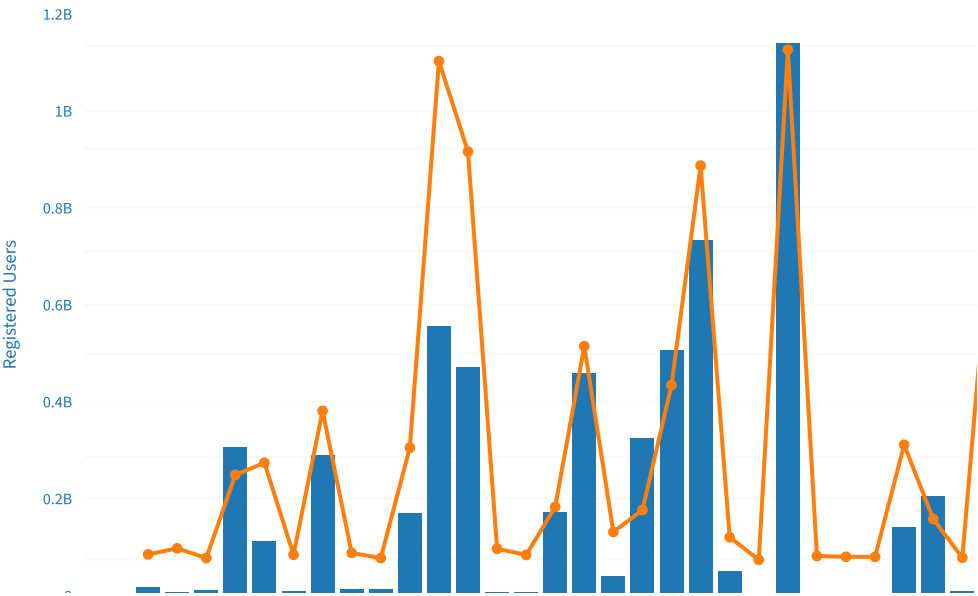

PhonePe aims to enhance user engagement and improve app performance by understanding user preferences across different device brands. The data reveals the number of registered users and app opens, segmented by device brands, regions, and time periods. However, trends in device usage vary significantly across regions, and some devices are disproportionately underutilized despite high registration numbers.

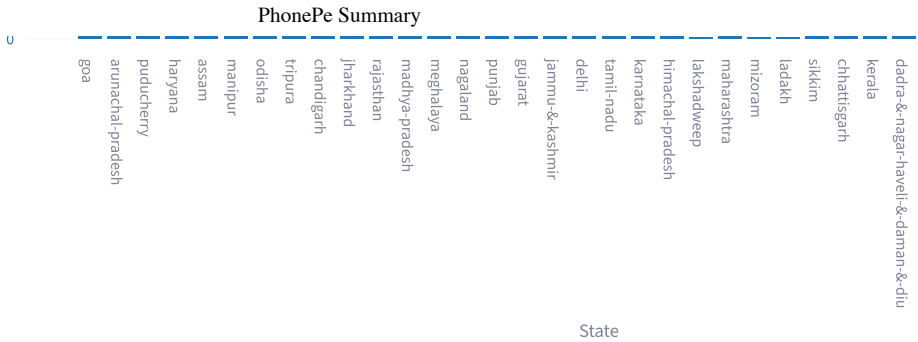

User Registration Analysis

Total User Registration Share by State
